soundbytes.txt

This problem is created by Prerit Rathi

Interscope, a technology firm, has called you to help them with a malfunctioning transmission program. The program is supposed to transmit files, but today it has given an output in the file `manysounds.txt`. As a cybersecurity engineer, you are tasked with finding out what the contents of `manysounds.txt` mean.

Look at the contents of the file using code and try figuring out what kind of file it is, and create the final file as output.

The answer to the puzzle is related to the file that gets created.
